

Measuring Info:

1 Start by measuring each wall of the room, and record the total inside dimension

2 Measure walls at floor, at center of wall and at ceiling to ensure accuracy and squareness.

Next measure each wall section and record on drawing.

3 Decide on the finished ceiling height _____

If the ceiling is vaulted, what is the shortest dimension? _____ The longest dimension? _____

4 Indicate center line for sink. Indicate outlets and switches and mark on drawing.

0' 1' 2' 3' 4' 5' 6' 7' 8' 9' 10' 11' 12' 13' 14'

scale" 1/2" equals one foot or each small square equals three inches.
